Introduction

- Footwear Shop is online platform where customer can buy footwear products online from just sitting at home at there comfort.
- Customer can select footwear products of there choices and they can add to cart or wishlist and they can place the order easily.
- They can make payment online or Pay cash on delivery.

- The ordered products will get delivered to there shops by the wholesaler.
- Its user-friendly interface helps the customer to buy any footwear product(available) from shop while sitting at home with ease.

Problem description & Existing system

- The Existing system is manual.
- Existing system is maintained by using registers/logbooks.
- In Manual work, the chance of error is high.

- Maintaining such kind of the single register for all types of records increases the error, data redundancy.
- To overcome these difficulties the system must be computerized.

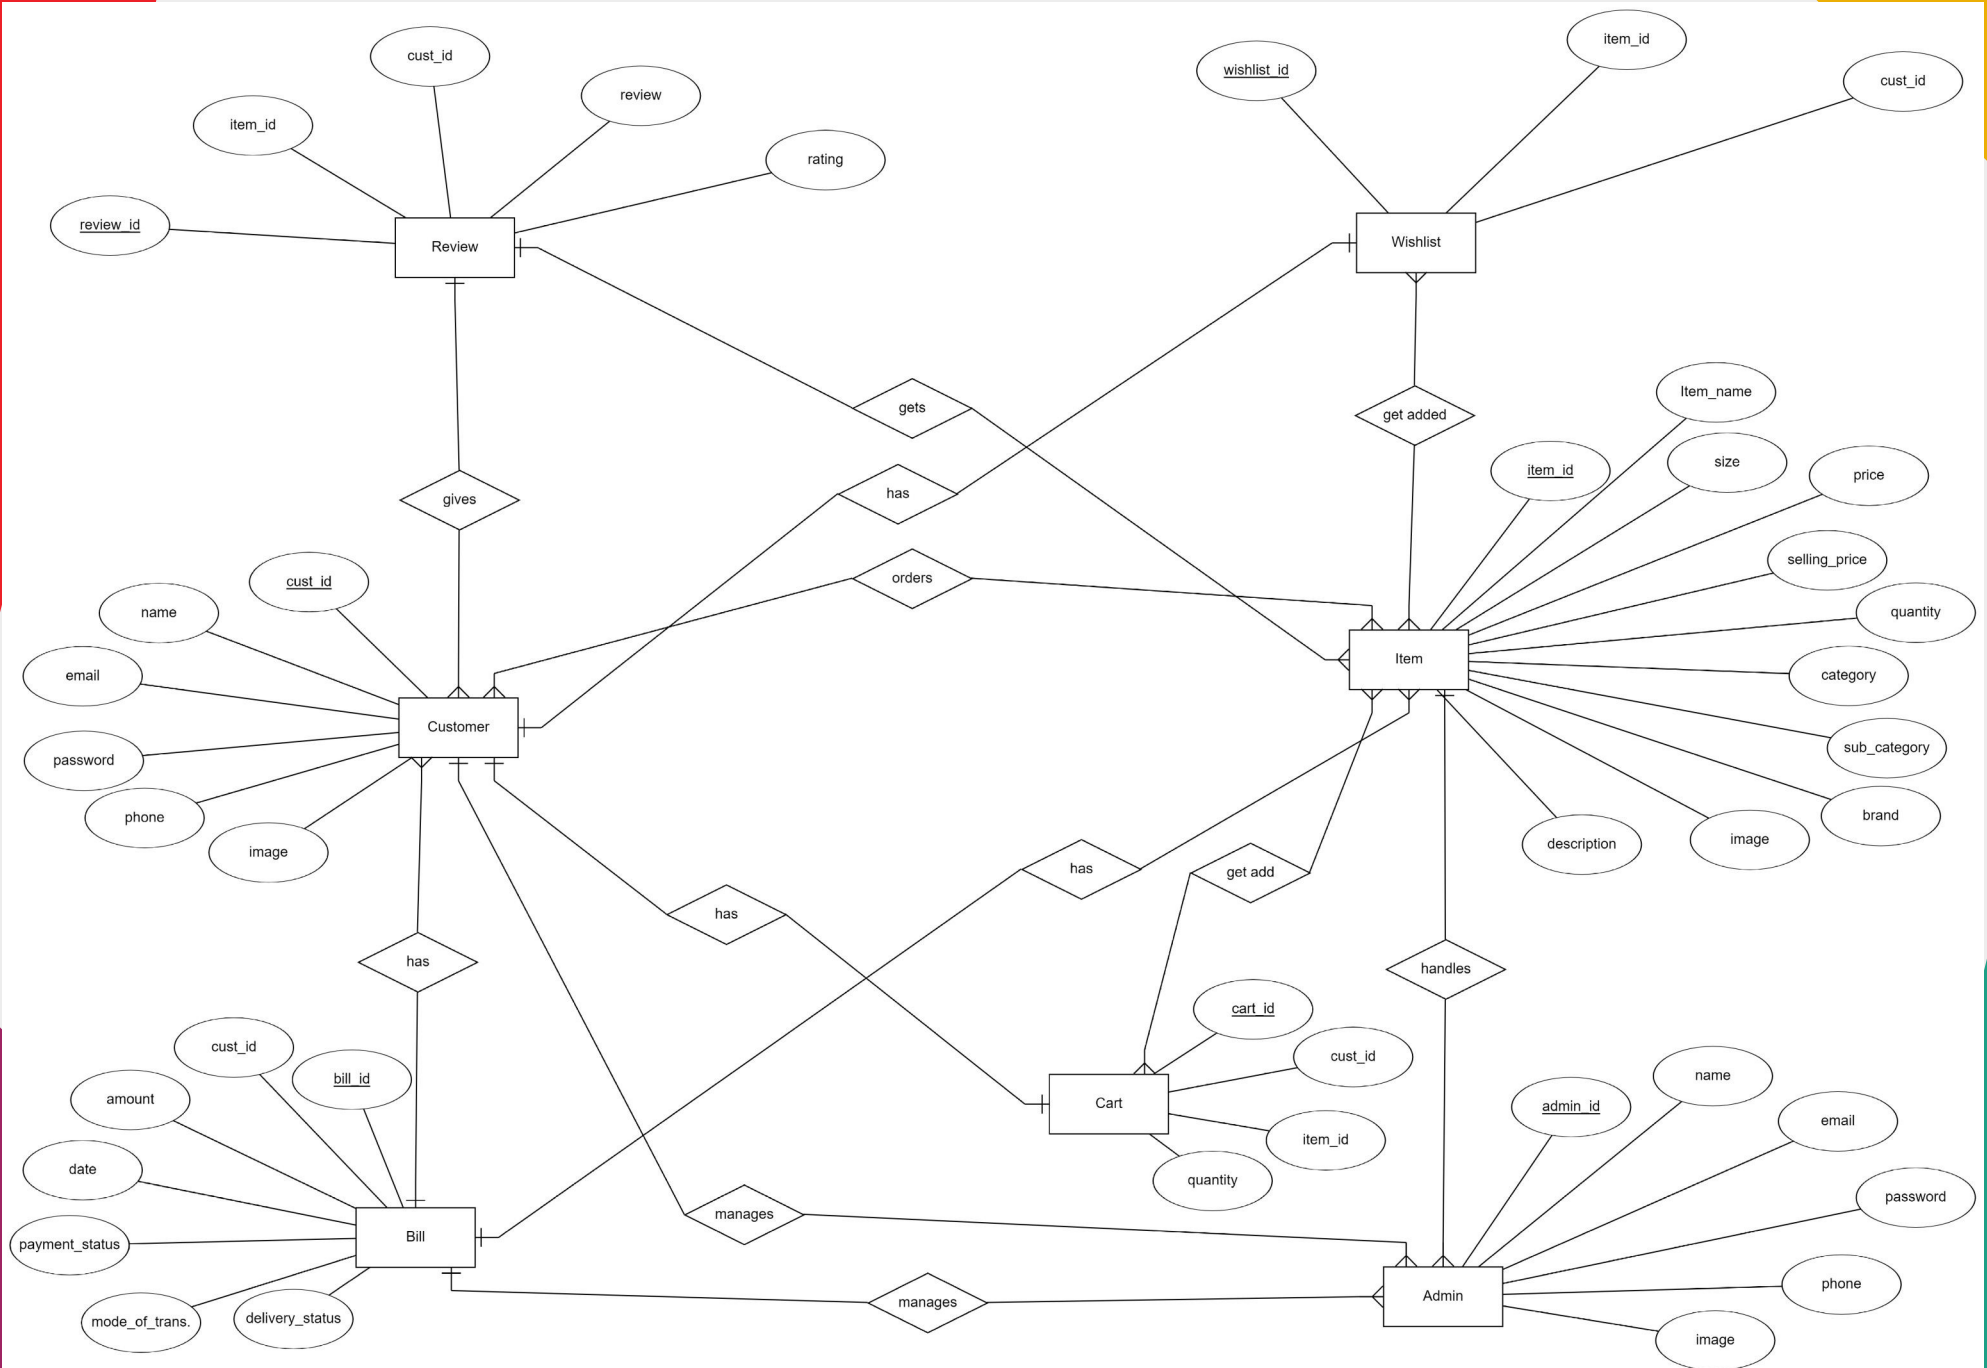

Purpose of the project

- Online Wholesale Footwear Shop is a platform which helps to connect customers to wholesaler via Online Wholesale Footwear Shop platform.
- In this customer have their login/sign up options through which they can access system and generate appropriate request.

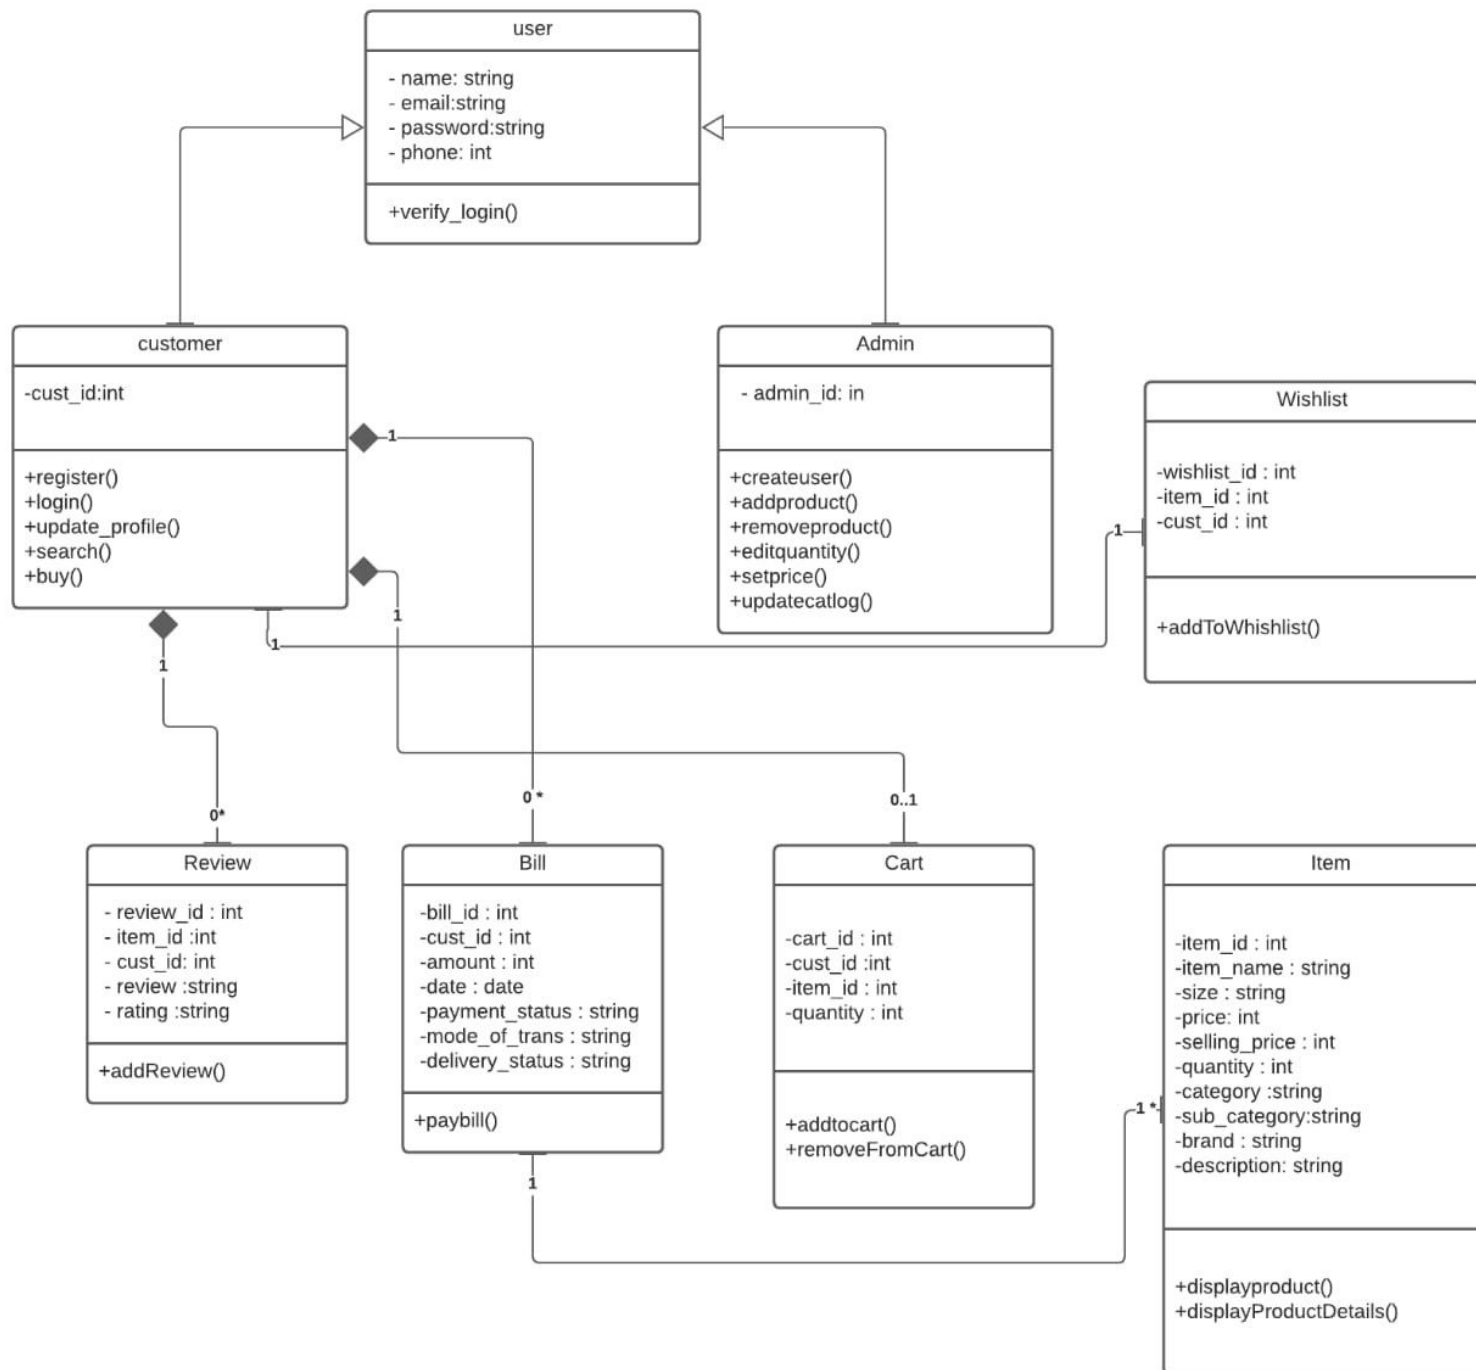

- Online Wholesale Footwear Shop has the list of footwear products, so that the customer will have choices and he can choose the product of his/her choices
- Admin will deal with all the things updating payment and product information and status on the system, and solving issues of customers.

- This will also ensure contact less delivery of products to customer.
- The objectives of this project are
 - To provide contact less product delivery
 - To make it convenient for people who have other commitments
 - Cost reduction
 - Reduced paperwork
